ZAP platform ladders

Hands free. Safe standing. Optimal mobility.

www.zarges.link/zap

As flexible as a ladder, as safe as a scaffold tower.

A ladder is the optimal solution for many applications because it is versatile, lightweight and transportable. However, a scaffold tower is often the best choice when safety is number one concern. But what if you need the best of both worlds?

ZAP platform ladders fill the gap between a ladder and a scaffold tower. They allow you to keep both hands free for work while standing safely. Furthermore, you can move them to your desired location quickly and effortlessly.

Hands free

ZAP platform ladders help you work with greater safety and comfort. Look out for the 2HF logo. The 2HF mark is used to indicate ZARGES products that allow you to have both hands free for work.

Safe standing

ZAP platform ladders stand out with their large stepping surface and a guardrail that secures at least three sides of the platform. The guardrail is at least 1,000 mm high, providing the user with a great sense of safety. For some models, there is even a four-sided guardrail available either as standard or as an optional add-on to provide all-round protection. All products meet the highest quality standards in terms of their material, design and workmanship.

Optimal mobility

Platform ladder models weighing more 20 kg are fitted with castors for easy transportation while remaining compact. The large platform measuring at least 400 × 400 mm allows for greater freedom of movement at the top of the platform ladder. For example, the user is able to work effortlessly on objects to the side of the ladder and move freely while on the platform ladder.

Compliance with applicable safety regulations and standards

All ZAP platform ladders meet the requirements of the EU directive for working at height and its implementation in the German Industrial Safety Regulation (BetrSichV) as well as the applicable DIN EN 131 standards. In addition, almost all platform ladders listed here comply with Part 7 of EN 131, which places stricter safety requirements on the design and stability of ladders.

Hands free

Safe standing

Optimal mobility

Benefits of ZAP platform ladders

- Large platform measuring at least 400 × 400 mm
- Guardrail that secures at least three sides of the platform
- Guardrail that is at least 1,000 mm high
- Foldable without using tools
- Fulfils at least EN 131 – as well as Part 7 where possible

Use the table to find the perfect solution quickly with ease.

There is always a right work platform for any application: Our comparison table is an easy way for you to quickly assess individual products based on their features and find the perfect solution for your task at hand.

Accessories: You can refer to the main catalogue for information on castors, stabilisers for compliance with EN 131-7, and safety cages.

ZAP Safemaster Plus S, flanged mobile platform ladder

The flexible, mobile solution for use with shelving units. Featuring great mobility, compact dimensions when folded, and a large storage tray.

Convenient

Large storage and retrieval tray.

Maximum safety

Three-sided peripheral guardrail for maximum work safety.

Work comfortably

Aluminium work platform measuring approx. 600 × 630 mm.

Easy to handle

Easily foldable to a compact size for storage.

Highly mobile

Narrow chassis. The chassis width is reduced to a minimum through additional ballasting.

Safe and versatile

The access section is fitted with a horizontal stabiliser bar, while the support section features a chassis beam and wheels with locking mechanism (Ø 160 mm).

| Platform height m | Working height m | Number of treads incl. platform | Order no. | |
|----------------------|---------------------|------------------------------------|-----------|--|
| 1.00 | 3.00 | 4 | 41201 | |

| 2.60 | 4.60 | 10 | 41207 | |
| 3.10 | 5.10 | 12 | 41209 | |

ZAP Telemaster S, flanged telescopic platform ladder

ZAP Telemaster S allows you to access different heights with just one platform ladder thanks to its easy-to-use height adjustment mechanism similar to a push-up ladder.

Built-in storage tray

On the guardrail.

Plenty of room to manoeuvre

Large platform measuring 665 × 440 mm.

Quick to set up/dismantle

Quick-release mechanism for stabilisers.

Easy to move

From point A to B thanks to large wheels on the ladder's rear.

Adjustable height

Well-designed lifting mechanism.

| Platform height m | Working height m | No. of rungs incl. platform | Order no. | |
|--|---------------------|--------------------------------|-----------|--|
| 0.81 / 1.08 / 1.34 | 3.34 | 5 | 41325 | |
| 1.05 / 1.30 / 1.60 / 1.83 | 3.83 | 7 | 41326 | |
| 1.31 / 1.60 / 1.80 / 2.10 / 2.35 | 4.35 | 9 | 41327 | |

ZAP Neo S, riveted platform ladder with treads

Ultralight platform ladder that can carry a maximum load of 150 kg. Thanks to its low weight, foldable handrails and large platform, the ladder is both convenient and comfortable to use.

Highest level of safety

Three-sided peripheral guardrail for maximum work safety.

Easy to handle

Foldable handrail to save space during transport.

Further enhanced safety

Guardrail that is 1,000 mm high.

Platforms

Work comfortably on the spacious platform (400 × 400 mm).

Safe standing

Comfortable, fatigue-free and safe standing on the 80 mm deep treads with safety ribbing.

| Platform height m | Working height m | Number of treads incl. platform | Order no. | |
|----------------------|---------------------|------------------------------------|-----------|--|
| 0.74 | 2.74 | 3 | 42440 | |
| 0.99 | 2.99 | 4 | 42441 | |
| 1.24 | 3.24 | 5 | 42442 | |
| 1.49 | 3.49 | 6 | 42443 | |
| 1.74 | 3.74 | 7 | 42444 | |
| 1.99 | 3.99 | 8 | 42445 | |

ZAP Teleneo S, flanged telescopic platform ladder

Versatile and convenient: The ZAP Teleneo S telescopic platform ladder stands out with its convenient storage tray as well as its handrails and guardrails that can be folded down to save space during transport.

Easy to handle

Can be folded to a compact size of 0.75×0.42 m for transport thanks to its foldable double-sided handrails and fold-up guardrail.

Convenient

Large tool tray with integrated pail hook.

Work comfortably

Spacious platform measuring 400×500 mm.

Exceptionally flexible

Height is adjustable thanks to ergonomic handles installed on both sides.

Versatile

Additional storage space at knee height for loads of up to 25 kg.

| Platform height m | Working height m | No. of rungs incl. platform | Order no. | |
|---------------------------|---------------------|--------------------------------|-----------|--|
| 1.04 / 1.29 / 1.55 / 1.80 | 3.80 | 7 | 41661 | |
| 1.54 / 1.79 / 2.05 / 2.30 | 4.30 | 9 | 41662 | |

Mobile access steps with platform

You can find further maintenance steps and work platforms that are compliant with EN 131-7 under the "Mobile platforms" product group.

Comfortable to stand on

Large platform measuring 600 × 800 mm.

Secure footing

200 mm deep treads.

Quick to set up

Sprung swivel castors.

Work safely

Three-sided guardrail with knee rail and toe plate.

Quick installation

Well-designed connecting parts.

Steps can be fitted with a double-sided handrail to comply with DIN EN 131-7.

- Option of either steel open-grid treads or aluminium treads

ZARGES –
Access.
Packaging,
transportation.
Special solutions.

For more than 85 years, the brand name ZARGES has been synonymous with premium quality and continuous innovation. As an innovation leader, we are constantly improving our range and creating solutions and products that are consistently tailored to your needs. And good ideas always come from closely working together with you, the customer.

Our aim is to always provide you, the professional, with the right solution for any requirement. For your safety and efficiency.
